

## PROJECT NAME

Curbside Re-development & Valet Lounge

## CURRENT CHALLENGE

At Skyxe Saskatoon Airport, we are always looking to the future to ensure that our facilities and infrastructure meet the needs of our community. Skyxe will be getting a facelift in 2018, upgrading and changing the flow and operations of our exterior public curbside.

## WHAT WE'RE DOING

The construction of a multi-million-dollar redesigned curbside will enhance our guest's airport experience through providing 2 designated lanes for both public traffic (City buses, family, and friends) and commercial traffic (Valet, taxi services, hotel shuttles, jetSet shuttle).

## WHAT TO EXPECT DURING CONSTRUCTION

Throughout the phasing of the project, there will be times where certain entrances/exits to the Air Terminal Building will be closed and traffic will be re-routed through the building. Signage inside the building will change as the project requires, with blue arrows on the floor helping to direct flow pre-security. Signage from the parking lot into the Air Terminal Building and vice-versa will be provided with clear instructions on entry and exit requirements. Covered passenger tunnels will be utilized at times to safely move guests through the construction zone. There will be limited space for drop-offs and pick-ups.

## ESTIMATED PROJECT COMPLETION DATE

Late fall 2018.

## DID YOU KNOW...?

- As part of this project, a new valet and concierge service, ValetXE, will open in the fall of 2018
- When the curbside project is complete, our new shuttle parking lot, jetSet will open
- A covered canopy will split the public and commercial curbs with ample sitting areas, green space and a pet relief area
