

PROJECT NAME

Car Rental South Entrance Vestibule

CURRENT CHALLENGE

The rental vehicles at the Saskatoon airport have been relocated to the parking lot next to the south-most doors of the air terminal building. Clearer access and the ability to accommodate higher person traffic into this parking lot is required.

WHAT WE'RE DOING

A larger external door and vestibule will be added near the current location on the south side of the air terminal building that will lead into the arrivals area of the air terminal building. There will also be a modification of the exterior building façade to incorporate more windows, directional signage and graphics.

WHAT TO EXPECT DURING CONSTRUCTION

People traffic will be restricted at the doors on the south end of the air terminal building. Access into and out of the building will be available at one of the remaining three sets of main air terminal building doors.

ESTIMATED PROJECT COMPLETION DATE

End of 2018
